

SAJIDULLAH KHAN

Fullstack Product Engineer & AI Engineer

Swat, Khyber Pakhtunkhwa, Pakistan | s5sajidyt@gmail.com | GitHub: github.com/S5SAJID |
Portfolio: s5sajid.github.io | LinkedIn: linkedin.com/in/s5sajid

PROFESSIONAL SUMMARY

Self-taught Fullstack Product Engineer with 4+ years of experience architecting and shipping complete, production-ready web applications, multi-tenant SaaS ecosystems, and AI-integrated digital products from the ground up. Deep technical foundation spanning end-to-end type safety, modern React & TanStack architectures, relational database design, and high-craft UI/UX. Proven track record of building MCP servers, multi-agent workflows, and production LLM integrations—transforming real-world business bottlenecks into fast, reliable software that people actually want to use.

TECHNICAL SKILLS

Languages &

Runtimes: TypeScript, JavaScript (ES6+), Python 3.12, SQL, HTML5, CSS3, Node.js, Bun

Frontend & Product

UI: React 19, Next.js 15 (App Router), TanStack Start / Router / Query, Vite, Astro, Tailwind CSS, shadcn/ui, Radix UI, GSAP, Puck Editor

AI & Agentic Systems: Mastra (@mastra/core, Memory, Tool Calling), Vercel AI SDK, Custom MCP Servers, RAG & BM25 Retrieval, OpenAI / Gemini / Groq APIs, ElevenLabs TTS

Backend & APIs: Node.js, FastAPI, Flask, Next.js Server Actions, Multi-Tenant Middleware, REST & OpenAPI Design, Better Auth, Auth.js, Webhooks

Databases & ORM: PostgreSQL (Neon, Supabase), SQLite (LibSQL, Cloudflare D1), Drizzle ORM, Prisma, Row-Level Security (RLS), Zod

Mobile, Desktop &

Tools: Flutter, React Native, Tauri, Git, Vercel, Cloudflare Workers, Figma, Biome, Postman

WORK EXPERIENCE

Product Engineer & Creator

2024 – Present

S5Brand & Independent SaaS Products (S5ARC, Dinelix, Edumedra, S5PAGES)

Swat, Pakistan · Remote

- S5ARC Multi-Tenant E-Commerce SaaS:** Engineered an end-to-end, headless-capable e-commerce platform (s5arc.store) using Next.js 15, PostgreSQL, and Drizzle ORM, enabling non-technical founders in Cash-on-Delivery (COD) markets to launch isolated storefronts with custom subdomains in under 60 seconds.
- Dinelix (formerly Plato) Restaurant SaaS:** Designed and deployed a real-time digital menu and ordering platform (dinelix.vercel.app) utilizing TanStack Start, Drizzle ORM, and Better Auth, actively serving independent restaurants with QR table menus, combo deal builders, live order dashboards, and automated WhatsApp order alerts.
- Edumedra Medical EdTech Platform:** Architected a full-stack gamified learning SaaS (edumedra.com) for MDCAT & NRE medical board preparation comprising 151+ TypeScript modules and an 8+ table relational schema, implementing server-side answer verification, active-recall challenges, LaTeX/Mafs rendering, weekly leagues, and XP streak mechanics.
- AI Integrations, Agents & MCP Servers:** Built AI features, multi-agent workflows (using Mastra, persistent memory, and sandboxed workspaces), and custom MCP servers that bridge LLMs with secure, localized database contexts—alongside automated Python media pipelines (AutoSec, Newa-Movi) combining RAG, ElevenLabs TTS, and Manim/MoviePy.

Full-Stack Developer & UI/UX Consultant

2020 – 2024

Freelance & Client Product Operations

Remote / Pakistan

- Architected and delivered bespoke web applications, conversion-focused brand platforms (including Safolife Tech, Kaaf Academy, and VivaGel™ BV), and mobile-first ordering flows from UI/UX wireframing to production deployment.
- Refactored legacy frontend codebases and implemented high-performance micro-interactions using GSAP, React, and Tailwind CSS, significantly improving Core Web Vitals, interaction responsiveness, and mobile conversion metrics.
- Built cross-platform web, mobile, and desktop applications while enforcing strict scope management, clean component architecture, and formal client delivery standards.

KEY PRODUCTS & PLATFORMS

S5ARC — End-to-End Multi-Tenant E-Commerce SaaS

[Live: s5arc.store] · [Repository]

Tech: Next.js 15, React 19, TypeScript, Drizzle ORM, PostgreSQL, Better Auth, Zod, Tailwind CSS

Built an open-source (AGPL-3.0) multi-tenant SaaS platform purpose-built for Cash-on-Delivery markets. Features 60-second store onboarding, dynamic subdomain middleware routing (*.s5arc.store), Row-Level Security (RLS) tenant isolation, automated inventory & order management, and a headless-ready REST API with webhooks and dedicated documentation.

Dinelix (formerly Plato) — Real-Time Restaurant Menu & Ordering SaaS

[Live: dinelix.vercel.app] · [Case Study]

Tech: TanStack Start, React 19, Drizzle ORM, PostgreSQL, Better Auth, Cloudinary, WhatsApp API, shadcn/ui

Engineered a lightweight, commission-free SaaS platform enabling independent restaurants to launch custom digital menus in minutes. Synchronizes live menu availability, promotional combo deals, print-ready QR table codes, and real-time WhatsApp order notifications across a unified, low-latency dashboard.

Edumedra — Gamified Medical Exam Preparation SaaS

[Live: edumedra.com]

Tech: TanStack Start, React 19, TypeScript, Drizzle ORM, Neon PostgreSQL, Better Auth, MafS / LaTeX, Tailwind CSS

Developed a high-engagement medical EdTech platform for MDCAT and NRE board preparation across 151+ TypeScript files and an 8+ table relational database. Features bite-sized active-recall lessons, secure server-side answer validation, 50+ achievement badges across 4 rarity tiers, weekly competitive leagues, and daily streak tracking.

S5PAGES — AI-Assisted Multi-Tenant Website Builder & CMS

[Live: s5pages.vercel.app] · [Case Study]

Tech: Next.js 15 (App Router), React 19, TypeScript, Puck Editor (@measured/puck), Google Gemini AI, Prisma, PostgreSQL

Created a multi-tenant SaaS website builder with an integrated e-commerce CMS and visual drag-and-drop canvas. Combines custom subdomain routing, pre-built responsive component blocks, and Google Gemini AI content generation so businesses can design and publish dynamic storefronts without code.

Civiora AI — Constitutional Legal Assistant (RAG Web Application) [Live: civiora.vercel.app] · [Case Study]

Tech: Next.js, React, TypeScript, AI SDK / LLM APIs, PostgreSQL, Tailwind CSS, shadcn/ui

Built an AI-powered civic and legal chat platform trained on the Constitution of Pakistan, translating complex constitutional provisions into clear, structured explanations backed by direct article references for citizens and students.

Melado & Nautev — Brand Commerce Platform & No-Code Page Builder

[Melado Case Study] · [Nautev Live]

Tech: Vite, TanStack Router & Query, Next.js, GrapesJS, Tailwind CSS, shadcn/ui, PostgreSQL

Designed and built **Melado**, a visual-first mobile ordering and Cash-on-Delivery checkout platform for an artisanal ice cream brand; and **Nautev**, a browser-based no-code HTML page builder with customizable responsive blocks.

EDUCATION & SELF-DIRECTED ENGINEERING STUDY

Self-Taught Product & Systems Engineering Curriculum

2020 – Present

Intensive multi-year independent engineering curriculum covering relational database

architecture at scale, multi-tenant SaaS design, distributed backend systems, UI/UX design systems, and applied AI/LLM engineering.

TECHNICAL HIGHLIGHTS & SPECIALIZATIONS

- **Database Design & Multi-Tenant Architecture:** Deep practical command of relational schema modeling, PostgreSQL indexing strategies, Row-Level Security (RLS) tenant isolation, and high-scale social/commerce schema patterns.
- **Full-Stack TypeScript & Serverless Systems:** End-to-end type safety with TypeScript, Zod, and Drizzle ORM across Next.js 15 and TanStack Start, deployed on edge/serverless runtimes (Vercel, Cloudflare Workers).
- **Applied AI & Programmatic Automation:** Hands-on experience building custom MCP servers, Mastra agent workflows, RAG chat interfaces, and programmatic Python media pipelines (auto-video-jorawalic, newa-movi) integrating LLMs, ElevenLabs TTS, and Manim/MoviePy.
